Lang Dental Announces New Shades of Jet Set-4™

Wheeling, IL – Dave Lang, President of Lang Dental Manufacturing Co., announced the expansion of shades offered in Jet Set-4, provisional crown and bridge acrylic. The need for additional shades arose with the increase in popularity in Jet Set-4. Shades 59/B1 and 60/A1 are now available.

Jet Set-4 is now offered in eight shades: 59/B1, 60/A1, 62/A2, 65/D3, 69/C2, 81/A3.5, OM1, and Clear.

Jet Set-4, initially introduced in 2010, is a traditional methyl methacrylate provisional crown and bridge acrylic. With a 2 minute working time and 4 minute set time, Jet Set-4 offers the durability and color stability of a methyl methacrylate with less chair time and less wait time than traditional Jet Tooth Shade. This product is available at a fraction of the price of Bisacryls.

Lang Dental Manufacturing Co. was founded in 1929 by Samuel Lang providing dental materials of the day to dental professionals. Since 1958, Lang Dental continues to develop, manufacture and distribute to dental professionals globally, trusted acrylics used to fabricate tooth-colored self-curing acrylics, denture base acrylics and supporting equipment. Trusted by clinicians and technicians worldwide, Jet and Lang brand products are known for their excellence and consistent performance.
